## EDUCATION

University of Toronto

September 2018 - Present

- Software Engineering Specialist
- Statistics Minor (BSc)

GPA - 3.81/4.0

Relevant Courses: Software Design, Intro to Software Engineering, Systems programming  
Intro to Machine Learning, Programming on the Web

## EXPERIENCE

Full-Stack Developer - Temerity Analytics Inc.

January 2020 - September 2020

- Implemented frontend **Angular** components, as well as the backend **Django REST API**
- Shown **dependability** by being trusted with the rewrite of our admin interface, completed fully to specification 1 week before the deadline
- Displayed leadership and **communication** skills by single-handedly pushing for, and implementing a frontend/backend testing methodology
- Received a final performance evaluation of 'Excellent'

## PROJECTS [>more](#)

SportsCred Web App

September 2020 - January 2021

- Worked with a scrum team of 6 to create a social media platform with a focus on sports
- Designed and implemented a large platform for competitive debate, trivia, and predictions, using an Angular and Django stack, using Jira for project management
- Displayed **leadership** and tenacity by leading group representation, as well as acting as the **lead frontend developer** of the group
- Selected as the best web app out of the entire class, and received work offers from the client

Personal ePortfolio [>repo](#)

November 2020 - Present

- Redesigned personal website with **react**
- Utilized **GitHub issues and actions** to optimize deployment and workflow (ex. Deploy on Merge to Master)
- Inspired by the Macintosh "System 1" OS
