EXPERIENCE

Full-Stack Developer - Temerity Analytics Inc.
January 2020 - September 2020

- Designed and Implemented frontend Angular components, as well as the backend Django REST API.
- Tasked with the redesign and rewrite of our admin interface, completed fully to specification 1 week before the deadline
- Received a final performance evaluation of 'Excellent'

PROJECTS [>more](#)

SportsCred Web App
September 2020 - January 2021

- Designed and implemented a large platform for competitive debate, trivia, and predictions around sports, using an Angular and Django stack with a team of 6.
- Displayed **leadership** and tenacity by leading group representation, as well as acting as the **lead frontend developer** of the group
- This resulted in an **89%** grade

Personal ePortfolio [>repo](#)
November 2020 - Present

- Overhauled personal website and used the opportunity to learn React
- Utilized GitHub issues and actions to optimize deployment and workflow (ex. Deploy on Merge to Master)
- Inspired by the Macintosh "System 1" OS

One Tap Location Sharing [>repo](#)
August 2019 - September 2019

- Created a web that that enabled users to share their current location as a custom link
- Utilized Flask and SQLite to update and retrieve user coordinate live
